

Turn Your Data into a Greater Competitive Advantage

Why another storage solution?

In order for businesses to compete effectively, they require the ability to capture, store and analyze massive amounts of data.

With data at scale, the **cost** of storage solutions are dominating the total cost of the competitive business process.

This needs to change.

Who is behind INFINIDAT?

INFINIDAT was founded in 2011 by legendary storage innovator **Moshe Yanai** and a team of storage developers who have been engineering enterprise storage arrays for **three generations**.

The INFINIDAT team has had a hand in designing and developing most of the storage systems operating in enterprise datacenters all over the world today.

What makes INFINIDAT different?

INFINIDAT's unique storage architecture provides superior value to clients without compromising **performance, reliability and scale**.

The InfiniBox™ solution is comprised of **over 100 patented storage innovations** and delivers unmatched:

Performance: >1,000,000 IOPS

Reliability: 99.99999% Uptime

Simplicity: Rich UX, Full CLI, RESTful APIs

Scalability: Scales to Over 2.5 PB in a Single Rack

Unified Storage: FC Block, NFS, FICON

Virtualization: Application Stacks, DPRA

How much is INFINIDAT growing?

425+ PB Shipped

Patents: 58+ Granted, 60+ More in Process

348 Employees in 17 Countries

Over 250 Systems Shipped Globally

Where are INFINIDAT solutions used?

Strong Sector Traction Among Fortune 100

Financial Services

Health Care & Life Sciences

Service Providers
